DETAILED ACTION

This is a first office action for serial number 10/615523, entitled Portable Wood Recovery and De-leading system, filed on July 8, 2003.

Election/Restrictions

A telephone call was made to Mr. Shalorm Wertsberger on April 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made at that time.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-44, drawn to a wood de-leading device, classified in class 241, subclass 34.
- II. Claims 45-46, drawn to a method for removing paint from a woodpiece, classified in class 241, subclass 28.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the steps within the method of removing paint from a wood piece of invention II does not necessarily have to be preformed by the wood de-leading device of invention I in order for paint to be removed from the wood piece; for example,

Art Unit: 3635

the paint on a wood piece could be removed by a chemical such as paint thinner, or the paint could be removed by a tool such as a chisel or sandpaper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
